Mattress Fibre
and Fibre Dust
can be obtained successfully**

DSF
2

There is no machine in the world which could produce & sorts four Coco Fiber grades in one machine

- Sorts all the grades of Coco Fiber.
- Separate the fibers and pack for shipment.
- Need only 1 operator versus 8 needed in conventional way
- 5000-6000 coconut husks could be processed in 8 hours shift.
- When compared with competitive semi-automatic machines: Costs a lot less.
- Consumes 74% less power
- Safer operation - does not cause loss of fingers and limbs
- Compact - Simplified operation - Saves space
- Makes all the Coco industry coir needs in one machine.

World's First All in One Coco de-fibering & Coirpith Sorting Machine.
It is Compact - Saves Space - Cheaper -Operational Cost 26% of Competitors
142 Machines already in Order.
