

Flexport's Luggala 50 acre land has 843 valuable trees like ebony, the value of the trees are worth more than Rs. 35m= US\$ 301,724.

Although we need cash for our development projects we do not want to destroy the fauna & flora and the trees which is considered the lungs of the earth. We are planing to have an eco tourism project and watch live wild life roaming around our site with heard of wild elephants who are daily crossing our land. The beautiful water stream running along our site.

We have one demonstrating tree house and 30 feet high track above ground avoiding damaging fauna and flora and no risk to human life from wild life and watch their natural life from above the ground. It is an a rare experience of one can enjoy for a life time.

We are expecting Rs. 12m = US\$ 100,000 immediate investment to launch the project to meet the demanding eco tourists . Recoverable with in one year.
